Thick

**“ A first barrier against rising damp.”**

General purpose heavy weight black polyethylene. Suitable for drop sheets, covering, garden, damp proof course, concrete underlay.

Complies with the New Zealand Building Code Standard (NZBC)

**\$95 +GST per roll ...  
only until stock lasts!**

## Applications

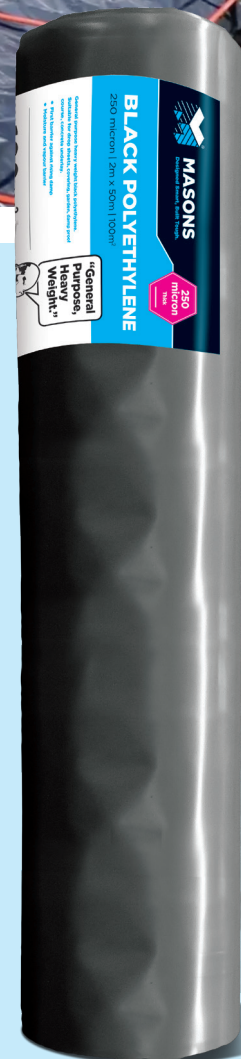

- Ideal for under floor on the ground to prevent the cold from rising to your floor boards.
- Great for all those foundation jobs as a moisture and vapour barrier.
- Temporary weather protection during building.
- General protection against dust and dirt.

## Durability

- Functions satisfactorily as a damp-proof membrane for a minimum of 50 years.
- Has a water vapour flow resistance of no less than 90 MN s/g (mega-newton seconds per gram).
- This polyethylene must be inspected for tears and penetrations.
- Should not be left exposed for more than 28 days.

## Physical Properties

- Easy to use. Light, flexible and easily cut on site with a sharp knife.
- Comes in rolls so easy to transport and handle.
